

+ ALLEVYN GENTLE BORDER Heel - The versatile heel dressing that has been designed to conform to the body, helping to enable patient comfort during wear.¹⁻³

Smith+Nephew

ALLEVYN[®]
GENTLE BORDER
Heel Foam Dressing

Application

Breast area

Breast surgery often creates wounds that need covering with a dressing. The dressing remains soft on the skin whilst being conformable to fit a wound on any area around the breast.⁴⁻⁷

Neck

The dressing conforms around this area, allowing the patient to carry on with their everyday life.^{1,2,4,5}

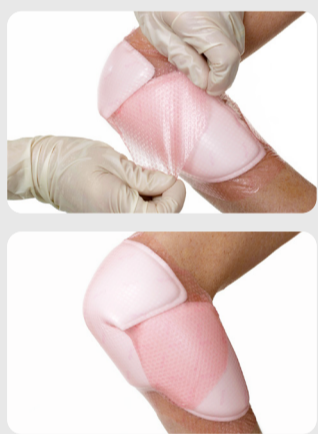

Under arm

The axilla is a notoriously difficult place to dress. The flexibility of the dressing conforms to the contours of this area.^{1,2,4,5}

Spine

Wounds on the spine can often be very sore. The ALLEVYN GENTLE BORDER Heel dressing offers protection, whilst remaining gentle on fragile skin.^{2,5,6}

Elbow

Bony prominences such as elbows are prone to developing wounds. The design of the dressing allows the patient's elbow joint to remain flexible whilst being soft on the skin.^{7,8}

Sacrum

The shape of the sacrum can often mean it is hard to dress. The design of the ALLEVYN GENTLE BORDER Heel dressing means it can be anchored securely in place on this area.⁹⁻¹²

Inside leg

Fits around the inside leg, providing protection for wounds in this and surrounding areas.^{1,2,4}

Heel

Designed specifically to fit around the heel, the dressing conforms to this area, providing a solution to any kind of acute or chronic heel wound.^{3,13}

Knee

The dressing remains anchored in place whilst allowing full flexibility of the knee joint.⁸

Foot

The shape and flexibility of the dressing makes it suitable for a wound on any area of the foot.^{1,2,4,5,13}

For detailed product information, including indications for use, contraindications, precautions and warnings, please consult the product's applicable Instructions for Use (IFU) prior to use.
